Education

M.S. in Business Analytics

Jul. 2024-May. 2025

Emory University, Atlanta, GA, USA

B.S. in Business: Finance

Aug. 2018-May. 2022

Miami University, Oxford, OH, USA

Research Experience

Research Assistant

Jul. 2024-now

Emory University, Atlanta, GA, USA

- Project 1: Applied fixed-effects regression, post-double-selection Lasso, and causal forests to transaction-level data for Bored Ape Yacht Club (BAYC) NFTs to estimate and interpret heterogeneous causal effects of traits and buyer-seller wallet characteristics on prices.
- Project 2: Developed a Python pipeline (requests & Selenium) that scraped metadata and downloaded videos from Archive.org, with pagination and error handling for a USC professor's research.
- Project 3: Developed a Python document-parsing agent using the GPT-4o API that transforms semi-structured Excel product-update logs into feature-level JSON/Excel summaries (date, feature, action, products affected) for downstream analysis.

Professional Experience

Data Specialist

Jul. 2025-now

ByteDance, Remote

- Data Labeling and Rubric Design for LLM Model Training

Data Scientist Intern

Dec. 2024-May. 2025

NCR Voyix, Atlanta, GA, USA

- Collaborated with the data science team to explore and build a new product by analyzing market opportunity windows and assessing the product's profit potential.
- Engineered unsupervised ML pipeline (K-means clustering, PCA) on customer transaction data (Size 2TB), and extended the pipeline to build Product Association (FPGrowth) and Collaborative Filtering (ALS) models to send either category or item recommendations.
- Utilized the dashboard on Tableau to visualize the recommendation results and customer segments for business users.

Product Management & Due Diligence

Feb. 2023-Aug. 2025

Miracle Plus (Formerly Y Combinator China), Haidian, Beijing, China

- Worked with research engineering team to design and develop AI agents that autonomously operate our forum, attracting technical researchers to post original content and engage with other users.
- Analyzed platform user activity data to track retention and engagement, and wrote reports/memos to recommend product optimizations based on user feedback.
- Conducted industrial research and due diligence to assist invested firms in accomplishing Product-Market Fit (PMF).

Financial Advisor Intern

Dec. 2022-Feb. 2023

Sinolink Security, Chengdu, Sichuan, China

- Advised individual clients on portfolio construction, conducting fundamental research on their equity holdings to align investment strategies with their financial goals and risk preferences.

Student Equity Analyst

Dec. 2021-May. 2022

Student Managed Investment Fund-Miami University, Oxford, OH, USA

- Served as Equity Analyst for a \$900,000 IT-sector allocation in a student-run university endowment, performing fundamental equity research and executing trades that outperformed the sector benchmark.

Partner

Apr. 2020-Jul. 2021

Oho Yeah Xinjiang Buns, Chengdu, Sichuan, China

- Oversaw the budgeting, operations, and management of a local restaurant specializing in Xinjiang cuisine.
